RE: Site Inspection, Unico, Inc., Deer Trail Mine, S/031/003, Piute County, Utah

Date of Inspection: October 13, 1999
Time of Inspection: 4:00 pm
Conditions: Warm and Clear
Participants: Lynn Kunzler and Doug Jensen, DOGM

Purpose of Inspection: Document site conditions.

On September 27, 1999 the Division received a new notice for this site from the USFS. The changes in the new plan were a change in the contact person (Dan Proctor is new contact) and they want to rework some of the old dumps on the patented lands. Mr. Winslow of the USFS was contacted via phone and informed that the Division does not need to approve a new contact and that since there is no change in operations for the USFS lands, the Division would have no comments on the new plan.

There has been no significant changes since last inspection. No one was at the site during this inspection. Of concern was that the new notice indicated that they would like to use the upper (patented area) site as well. A small (about 2-yard pile) of gravel had been dumped recently. There has also been some light traffic in this area.

Several attempts to contact Mr. Proctor via phone to discuss his plans have been made. On October 31, 1999 contact was finally made. His intent was to use the 1 acre pad area that had been previously reclaimed to reprocess some of the old dumps on the patented lands. He was told that since the project currently involves about 4.7 acres, he would need to either reclaim a portion of the site first or submit a Large Mining Notice.

No photos were taken of the site
